EMBALLAGE PACKAGING

Protecting the environment is one of our primary preoccupations, but the quality of life at work is equally one of our core values.

BARRIERTEC is growing and looking for new talent. The company is seeking a Director of Process and Finished Product Quality Control.

The Director of Quality Control will be responsible for the detailed review of assigned customer files under the laboratory director and general manager's supervision. The Quality Control Manager will plan, coordinate, and direct the control of all quality assurance activities to ensure compliance. The Quality Department complies with regulatory requirements and Barriertec policies.

- Prepare production schedules.
- Lead quality control inspections of packaging and finished products.
- Hire, supervise and train employees using new equipment or production techniques and processes.
- Plan and implement changes to machinery and equipment, production systems and work methods.
- Plan, organize, direct, control and evaluate daily operations related to finished products.
- Maintain up-to-date knowledge and keep abreast of new standards to perform the position's duties.

Conditions of employment and benefits :

- Flexible hours, Monday to Friday, 8:30 a.m. to 4:30 p.m. (35 hours/week)
- Competitive salary plus company profit-sharing.

730 Bernard street, Granby, QC J2J 0H6

BARRIERTEC works in the field of innovation, developing high-performance barriers to remove polyethylene and all contaminants from fibre-based packaging, making it 100% repulpable and recyclable. Thanks to our research center based in our new premises, we are developing our technology and applying it directly to paper and cardboard. Finally, our new BeCup division enables us to test finished products in the factory and produce our packaging under the Be repulpable brand.
